

## WorldSkills UK Competition – Heats

### Equipment List

Computer including tower, monitor, mouse, keyboard.

The side must be removable from the computer

Leads to include power to both monitor and PC, ethernet, mouse and keyboard. No lead from monitor to PC (VGA or HDMI) as this is part of the examination to see if the competitors realise that this is missing and makes the PC unusable.

Package of drugs (small bag of flour wrapped in brown tape)

Firearm (BB Gun is ideal for this as they are similar to real firearms)

The above two items are hidden inside the PC tower

Used pad of paper with no notes written on it.

Remember the suspect has full access to this room so his DNA and fingerprints are expected on the items outside the PC. We would hope to recover the tower, the firearm, the package and the pad. The first three items for fingerprints and DNA as well as ballistics and drug analysis. The pad to be used for indented writing.

A chair and table
